EXPERIENCE

Microsemi Corporation, Hyderabad

Staff Web Developer (Jan 2015 – Present)

➢ Parametric Search: Creating a **Node.js** API which supplies data to a Parametric Search UI being written in **Angular** and Integrating the App into current website powered by the **Joomla CMS**

➢ Designed a normalized structure for Numeric and Alphanumeric parameters and developed new interface around it

➢ Developed Bulk Import and Export tool for Parametrized data

➢ Stock Availability Application: Created a Service to load/retrieve data from OCTOPART to local database; Designed and integrated the application on Product Category and Part Specific pages along with Standalone version

➢ Converted a multi-tiered website system to utilize the **Git-Flow** source control workflow using **Git**

➢ Facilitated multiple major content migrations from acquired company websites. In each case they required custom technical solutions to reduce intensive human labor and reduced the project timelines by more than half the original estimate.

➢ Page Scoring for lead nurturing implementation

➢ In addition to daily user support, conducted several training sessions for internal users who edit website content

➢ Website Layout & Updates
   o Implementing a modern design for 3 column layouts and a New Mega Menu on the website
   o Automation of the menu creation on Product Category and Product pages
   o Data driven implementation between application and product pages
